Salary Distribution

- Salaries vary widely across cities and job titles.
- Certain cities consistently pay more, while others lag behind.
- Remote roles sometimes outpace on-site, but in a few cities on-site has the advantage.

Top Employers

- A few companies dominate the job postings.
- These employers are clustered around large cities and often require overlapping skill sets.

Skills in Demand

- A handful of technical skills (e.g., Python, SQL, Machine Learning) dominate demand.
- Soft skills and cloud/AI tools appear less frequently but are growing.
- One “Hottest Skill” stands out (most frequently required).

Career Progression

- Career ladder: Junior → Mid-level → Senior → Lead.
- Mid-level positions form the largest share, while Lead roles are relatively few.

Job Types

- Majority of roles are hybrid or remote, showing flexibility in hiring trends.
- On-site roles are shrinking in number compared to remote ones.

Recommendations

For Job Seekers

- Focus learning on the top 5 most demanded skills—especially the “Hottest Skill”.
- Apply strategically in cities or employers with higher average salaries.
- If career growth is a priority, track companies offering a clear progression ladder.
- Remote roles may provide better salaries in some cities—compare before applying.

For Employers

- To stay competitive, benchmark salaries against top-paying cities and remote roles.
